CyberInsure360™

Cybersecurity Insurance Assessment by SecureGovernComply®

Cyber insurance can protect businesses from financial losses due to cyberattacks, data breaches, and operational disruptions—but only if your organization meets policy requirements and manages risk effectively. Many SMBs are underinsured or unaware of gaps that could invalidate coverage.

SecureGovernComply's **CyberInsure360™** service provides a **comprehensive assessment of your cybersecurity posture** in the context of insurance eligibility and coverage. We identify vulnerabilities, evaluate current controls, and help ensure your organization is positioned to **obtain optimal coverage at competitive rates**.

With CyberInsure360™, your business gains **confidence, clarity, and control over cybersecurity insurance risks**.

Risk Assessment & Gap Analysis

Evaluate current cybersecurity policies, procedures, and technical controls.

Identify vulnerabilities that could impact insurance coverage or premiums.

Benchmark security posture against industry standards and insurance requirements.

Insurance Readiness Review

Review existing cyber insurance policies and coverage limits.

Assess compliance with policy requirements and underwriting standards.

Provide recommendations to reduce risk exposure and enhance coverage eligibility.

Security Controls Recommendations

Suggest improvements to policies, processes, and technologies to meet insurer expectations.

Prioritize actions based on risk, cost, and potential insurance impact.

Integrate with existing services such as ManagedEndpoint360™, MFA360™, and ComplianceManager360™ for holistic risk reduction.

Audit & Documentation Support

Provide documentation and evidence required for insurance underwriting.

Maintain records of risk assessments, remediation actions, and control validation.

Support audits and provide reports to demonstrate risk management diligence.

Continuous Improvement & Monitoring

Monitor evolving cyber threats and adjust recommendations to maintain insurance readiness.

Provide ongoing guidance for maintaining compliance with insurance requirements.

Track improvements to reduce premiums and enhance overall security posture.

Scalable & SMB-Friendly

Designed for small and mid-sized businesses seeking insurance preparedness.

Flexible assessment models to fit organizational size, industry, and budget.

Cost-effective solution that enhances both security and insurance outcomes.

The SecureGovernComply Difference

Insurance-Focused Cybersecurity Expertise – Align risk management with insurer expectations.

Holistic Risk Management – Integrates security, compliance, and insurance considerations.

Actionable Recommendations – Reduce premiums and improve coverage eligibility.

SMB-Oriented – Practical, scalable, and easy-to-implement guidance.

With **CyberInsure360™**, SecureGovernComply ensures your organization is **prepared, protected, and positioned** to maximize cyber insurance benefits while reducing financial and operational risk.

CyberInsure360™: Protect your business, optimize coverage, and manage cyber risk with confidence.
