NetworkEvaluation360™

Acquired Network Risk Evaluation by SecureGovernComply®

Acquiring a new business can provide growth opportunities—but it also introduces **hidden cybersecurity risks**. Legacy systems, misconfigured networks, and unknown vulnerabilities can create exposure, compliance issues, and financial liability.

SecureGovernComply's **NetworkEvaluation360™** provides a **comprehensive risk assessment of acquired networks and systems** before, during, or after a merger or acquisition. We help organizations identify vulnerabilities, evaluate compliance gaps, and provide actionable insights to **mitigate risk and secure the investment**.

With NetworkEvaluation360™, your organization gains **confidence and clarity in every acquisition, protecting both assets and reputation**.

Comprehensive Network Assessment

Conduct detailed security scans of acquired networks, endpoints, and cloud environments.

Identify vulnerabilities, misconfigurations, and outdated systems that could be exploited.

Assess network architecture, segmentation, and access controls for security and efficiency.

Compliance & Regulatory Review

Evaluate compliance with industry regulations such as HIPAA, PCI-DSS, GDPR, and CMMC.

Identify gaps that could impact liability, reporting, or operational continuity.

Provide recommendations to bring acquired networks into regulatory alignment.

Risk Prioritization & Remediation Planning

Assign risk levels based on severity, likelihood, and potential business impact.

Recommend mitigation strategies and prioritization for remediation efforts.

Provide a clear roadmap to integrate the acquired network securely into your environment.

Due Diligence & Acquisition Support

Offer executive summaries and detailed technical reports for merger and acquisition decisions.

Assist in vendor negotiations and post-acquisition integration planning.

Provide documentation to satisfy audit and insurance requirements.

Ongoing Monitoring & Assurance

Optional continuous monitoring of newly integrated networks.

Track remediation progress and validate corrective actions.

Ensure ongoing security and compliance across integrated systems.

Scalable & SMB-Friendly

Designed for small and mid-sized businesses engaging in mergers or acquisitions.

Flexible engagement models to fit organizational size, risk profile, and budget.

Cost-effective approach to protect investments and minimize post-acquisition surprises.

The SecureGovernComply Difference

Acquisition-Focused Expertise – Identify hidden cybersecurity risks before they impact your business.

SMB-Oriented – Practical, scalable, and easy to implement.

Actionable Insights – Provide clear recommendations to mitigate vulnerabilities.

End-to-End Evaluation – From assessment to remediation planning and ongoing assurance.

With **NetworkEvaluation360™**, SecureGovernComply ensures your acquisitions are **secure, compliant, and fully assessed**, protecting your investment and giving leadership confidence.

NetworkEvaluation360™: Evaluate, secure, and integrate acquired networks with certainty.
