PCIScan360™

PCI Compliance Scanning by SecureGovernComply®

If your business processes, stores, or transmits credit card information, **PCI compliance isn't optional—it's essential**. Non-compliance can lead to costly fines, lost trust, and potential breaches.

SecureGovernComply's PCIScan360™ simplifies the path to **Payment Card Industry Data Security Standard (PCI DSS)** compliance. Built on **Sectigo's industry-leading HackerGuardian platform**, PCIScan360™ delivers automated, accurate, and affordable PCI vulnerability scanning designed specifically for small and mid-sized businesses (SMBs).

Our service not only scans your external network assets for PCI vulnerabilities—it provides guided remediation, compliance reporting, and ongoing monitoring to help you **stay compliant, secure, and confident**.

Comprehensive PCI Scanning

Conducts **automated vulnerability scans** across all Internet-facing IPs, domains, and web applications in your payment environment.

Identifies vulnerabilities such as outdated software, insecure configurations, open ports, and potential attack vectors.

Fully compliant with PCI DSS **Approved Scanning Vendor (ASV)** standards through Sectigo's HackerGuardian platform.

Guided Remediation and Reporting

Provides **detailed scan reports** highlighting vulnerabilities by severity and impact.

Includes step-by-step remediation recommendations to resolve findings quickly and efficiently.

Generates **official PCI compliance certificates** upon passing scans, ready for submission to your acquirer or merchant processor.

Easy-to-Use Dashboard

Centralized web portal for scheduling scans, viewing results, and tracking compliance progress.

Simplifies management for non-technical users while providing depth for IT administrators.

Visualizes progress from "scan to certification," ensuring clarity at every step.

Scheduled and On-Demand Scans

Flexible scan scheduling—automated monthly, quarterly, or custom frequency.

Run on-demand scans anytime to validate remediations or prepare for audits.

Continuous visibility into your compliance posture, not just once a year.

Continuous Compliance Assurance

Detects new vulnerabilities as they emerge and alerts you to changes in your environment.

Helps ensure ongoing adherence to PCI DSS requirements 6.1 and 11.2.

Reduces compliance drift by maintaining regular, verifiable scan activity.

SMB-Focused Design

Built for **small** and **mid-sized merchants**, service providers, and e-commerce businesses.

Affordable pricing with enterprise-level reliability.

Scalable to support single-site operations or multi-location networks.

The SecureGovernComply Difference

Powered by Sectigo's HackerGuardian ASV Platform – Trusted PCI scanning technology recognized globally

360° Integration – Works seamlessly with SecureGovernComply's broader "Secure, Govern, Comply" ecosystem for complete protection.

Simplified Compliance Journey – Easy setup, clear reporting, and actionable guidance

SMB-Optimized – Affordable and intuitive for smaller teams without sacrificing depth

With **PCIScan360™**, SecureGovernComply gives you more than a scan—it gives you **clarity, confidence, and compliance**. Our guided PCI DSS scanning solution helps your organization safeguard customer data, reduce risk, and maintain compliance with ease.

PCIScan360™ — Simplify Compliance. Strengthen Trust. Stay Secure.
