Password360™

Password Manager Solution by SecureGovernComply®

Passwords remain the **first line of defense** for business security—but managing them manually is risky, inefficient, and prone to human error. Weak, reused, or forgotten passwords are the leading cause of security breaches and unauthorized access.

SecureGovernComply's **Password360™**—powered by 1Password—offers a **centralized, secure, and easy-to-use password management solution**. It empowers your team to create, store, and share strong passwords while ensuring compliance and reducing administrative overhead.

With Password360™, your organization gains **security, convenience, and control over credentials**.

Secure Password Vault

Store passwords, credentials, and sensitive information in a fully encrypted vault.

AES-256 bit encryption and zero-knowledge architecture ensure only authorized users can access data.

Access credentials from desktops, browsers, or mobile devices securely.

Simplified Credential Sharing

Share passwords safely with team members without exposing plaintext credentials.

Control access permissions to protect sensitive accounts.

Audit trails track who accessed which credentials and when.

Password Generation & Strength

Generate strong, unique passwords automatically for every account.

Enforce organization-wide password policies to reduce risk.

Identify weak, reused, or compromised passwords and remediate quickly.

Integration & Compatibility

Works across web apps, cloud platforms, and enterprise software.

Seamlessly integrates with Single Sign-On (SSO) and multi-factor authentication (MFA) solutions.

Supports browser extensions, mobile apps, and desktop clients for full coverage.

Monitoring & Alerts

Receive alerts for potential password breaches or vulnerabilities.

Continuous monitoring for dark web exposures of company credentials.

Proactive recommendations to improve password hygiene and compliance.

Compliance & Reporting

Helps meet HIPAA, PCI-DSS, GDPR, and other regulatory requirements.

Provides audit-ready reports for credential usage, sharing, and security practices.

Strengthens cyber insurance eligibility through documented controls.

The SecureGovernComply Difference

Enterprise-Grade Security – Protect credentials with world-class encryption.

User-Friendly Design – Easy adoption across your organization.

Compliance + Governance – Meet regulatory requirements and maintain oversight.

Centralized Management – Control passwords, access, and policies from one platform.

With **Password360™**, SecureGovernComply ensures your organization's credentials are **secure, accessible, and manageable**, reducing risk and strengthening digital trust.

Password360™: Protect, manage, and control your passwords—effortlessly and securely.
