PhishTest360™

Security Awareness Testing by SecureGovernComply®

Humans are often the **weakest link in cybersecurity**. Phishing attacks and social engineering remain the most common entry points for breaches, yet many organizations don't know how resilient their workforce truly is.

SecureGovernComply's **PhishTest360™** service provides **continuous, realistic testing of employee security awareness**. By simulating phishing campaigns and analyzing responses, we help you identify vulnerabilities, measure risk, and strengthen your organization's human firewall.

With PhishTest360™, you don't just train employees—you validate their preparedness.

Simulated Phishing Campaigns

Launch realistic, automated phishing emails tailored to your business environment.

Test employees against credential theft, malicious attachments, and social engineering.

Measure susceptibility and identify high-risk users.

Behavior Tracking & Analytics

Track click rates, report submissions, and other user behaviors.

Measure improvement over time with detailed analytics.

Identify trends and areas for targeted training reinforcement.

Integration with Security Awareness Training

Works hand-in-hand with **Aware360™** training modules.

Directly link testing results to training gaps for maximum impact.

Supports ongoing education and reinforcement strategies.

Customizable Testing Programs

Campaigns tailored to employee roles, departments, or risk profiles.

Schedule campaigns monthly, quarterly, or ad hoc.

Adjust difficulty and attack types to simulate evolving threats.

Compliance & Audit Support

Provides evidence for HIPAA, PCI-DSS, GDPR, CMMC, and other regulatory requirements.

Generates audit-ready reports demonstrating employee testing and remediation efforts.

Improves cyber insurance posture by demonstrating proactive risk management.

Continuous Improvement

Benchmark performance over time.

Identify recurring risks and measure the effectiveness of interventions.

Build a culture of vigilance and accountability across your organization.

The SecureGovernComply Difference

Realistic, Measurable Testing – Know exactly where your human risk lies.

Designed for SMBs – Affordable, scalable, and easy to deploy.

Training + Testing Alignment – Close the loop between awareness training and measurable results.

Actionable Insights – Convert test data into meaningful improvements in security posture.

With PhishTest360™, SecureGovernComply helps you measure, monitor, and improve employee readiness against phishing and social engineering attacks

PhishTest360™: Test today, protect tomorrow, and strengthen your human firewall.
