Remediation360™

Vulnerability Remediation by SecureGovernComply®

Finding vulnerabilities is only half the battle—**fixing them is what truly secures your business**. Too often, organizations stop at scanning, leaving critical gaps unaddressed and risk unresolved. Attackers exploit these windows of opportunity, turning small flaws into devastating breaches.

SecureGovernComply's **Remediation360™** service goes beyond identifying risks to actually closing them. By combining expert guidance, prioritized patching, and streamlined remediation processes, we help your business shrink its attack surface, improve compliance, and strengthen resilience.

With Remediation360™, you don't just know your risks—you **eliminate them**.

End-to-End Vulnerability Management

Turn scan results into actionable remediation plans.

Prioritize vulnerabilities by severity, exploitability, and business impact.

Align remediation efforts with compliance requirements.

Patch Management & Deployment

Automated patching for operating systems and applications.

Secure configuration updates for servers, endpoints, and cloud resources.

Tested rollouts to reduce downtime and minimize disruption.

Expert Guidance & Support

Security specialists provide step-by-step remediation assistance.

Tailored recommendations for your IT environment.

Ongoing advisory to prevent recurrence.

Integration with Existing Workflows

Works seamlessly with ticketing systems and ITSM tools.

Ensures IT and security teams stay aligned.

Centralized dashboards for tracking remediation status.

Compliance & Audit Readiness

Demonstrates active remediation for PCI-DSS, HIPAA, CMMC, and more.

Provides audit-ready reports showing vulnerability closure rates.

Improves cyber insurance eligibility and reduces premiums.

Continuous Improvement

Scheduled reviews of vulnerability trends.

Metrics-driven reporting to measure risk reduction.

Aligns with industry best practices like NIST and CIS Controls.

The SecureGovernComply Difference

Beyond Scanning – We don't just find vulnerabilities; we help you fix them.

Proven Process – Trusted frameworks and automation for efficient remediation.

Compliance + Security – Meet requirements while strengthening real-world defenses.

Built for SMBs – Cost-effective, scalable solutions designed for resource-limited teams.

At SecureGovernComply, we believe technology alone isn't enough—**your people must be cyber-ready too.** With our **Aware360™ Security Awareness Training**, you'll reduce risk, empower employees, and protect your business where it matters most.

Aware360™: Turning awareness into your strongest line of defense.
